

The professional renderings of new landscaping coming to Waterside are included on the next four pages. More landscaping plans will be coming in 2024.

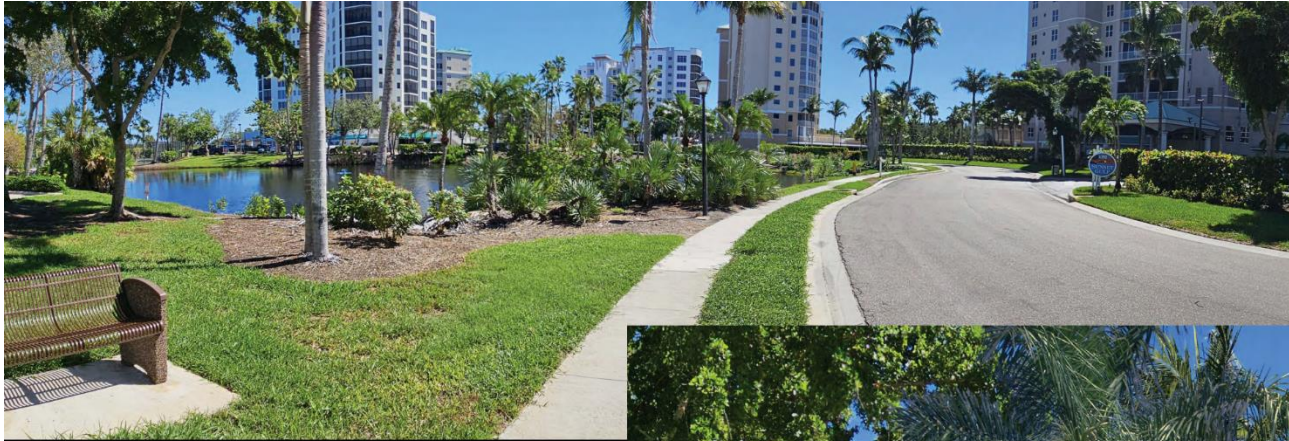

This page shows the existing view of the Waterside entrance and the rendering of the new landscaping and entrance sign. The area between the entrance sign and WS I is shown in the background.

This page shows the existing view of the first and second island as you enter Waterside and then the rendering of the new landscaping.

This page shows the existing view of the area just past Waterside II on the left before you get to Sunset Gulf. The rendering removes some of the existing plants, the mangroves in the pond and adds new plants.

This page shows the existing view of the area around the lift station, and the triangle shaped area that includes irrigation well equipment and transformers. The rendering shows how we are trying to hide this equipment.
